Your Protection

According to the American Diabetes Association, there are many things you can do to keep your feet healthy. Foremost among these is wearing comfortable shoes and inserts that fit well and protect your feet.

SureFit provides the highest quality custom made and direct molded diabetic inserts, which are 100% Medicare compliant. SureFit inserts help cushion tender areas of the foot due to thinning or decreased size of the foot's natural cushion. SureFit's custom inserts and orthoses also help prevent blisters and/or ulcers and reduce painful calluses.

Your Best Solution

One of the harmful effects of diabetes is that it weakens your foot's sensitivity. Wearing proper fitting footwear and inserts helps to prevent foot complications which impact more than 1 in 5 diabetics.

However, being diabetic no longer means having to wear "special shoes". SureFit's wide shoe selection provides the proper balance between the style you want, the comfort you demand and the fit you need.

For the ultimate footwear solution, choose SureFit shoes with precision crafted inserts.

SUREFIT™
Your best fit forward.

You Are Entitled

SureFit Victoria
S686-1

The importance of proper footwear is recognized by Medicare as essential for persons with diabetes.

As such Medicare Coverage includes:

- > *One pair of SureFit* extra depth shoes per calendar year.*
- > *Three pairs of premium SureFit* custom inserts or three pairs of SureFit heat moldable inserts per calendar year.*

3 Pair Custom Inserts
per calendar year

Your feet are as unique as your fingerprint. You want to wear shoes that reflect your individual taste and lifestyle needs while providing the proper therapeutic fit for your foot conditions.

SureFit offers a wide choice of contemporary styles from many of the biggest names in the shoe industry - New Balance, Hush Puppies, Rockport, Aetrex and more. And all are specifically designed to meet the individual needs of diabetic feet.

All SureFit Shoes and inserts have been approved by Medicare

63% of Diabetics risk serious foot problems by wearing the wrong-sized shoe*. Of this group, 45% wear the wrong width shoe and 55% wear shoes that are too narrow.*

Did you know that shoe size and fit can vary widely among different brands and styles, similar to clothing? Most people have one foot larger than the other and your feet generally change size as you age. All good reasons to have your feet measured precisely to achieve your best fit.

For proper fit, it is important to have your healthcare professional ensure there is a good match between your foot shape, the shoe shape, any foot conditions and the style you prefer. SureFit's Patented Fitting system provides him/her the tools needed to ensure the best fit for your feet is achieved.
